CARDS

Entrust Datacard

Plain PVC Card

- PVC blank white cards allows a very good quality of prints.
- Flat surface ensure flawless moves under the print head (minimizing the risk of damage and printouts with vivid colors and well-defined barcodes.

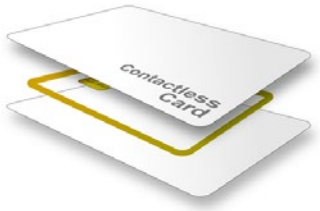
Smart Card

- Has an embedded integrated chip that acts as a security token.
- Typically have the same size as a driver's license or credit card and can be made out of metal or plastic.

Magnetic PVC Card

- Capable of storing data by modifying the magnetism of tiny iron-based magnetic particles on a band of magnetic material on the card.
- The magnetic stripe, sometimes called swipe card or magstripe, is read by swiping past a magnetic reading head.

Contactless Card



- Contactless smart card is a contactless credential whose dimensions are credit-card size.
- Its embedded integrated circuits can store and sometimes process data and communicate with a terminal via NFC.
- Commonplace uses include transit tickets, bank cards and passports.

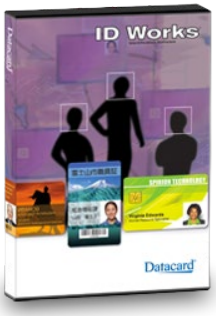
Genuine Printing Software for your Datacard ID Printers

Entrust Datacard™

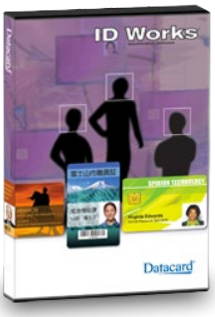
PRINTING SOFTWARE



571897-001-ID Works Basic v6.5

• Offers a discrete set of features you can use to create and maintain a start-up ID program.

• When your program needs greater versatility for card creation and image handling, you can easily add new features and capabilities by upgrading to ID Works® Basic, Standard or Enterprise identification software.

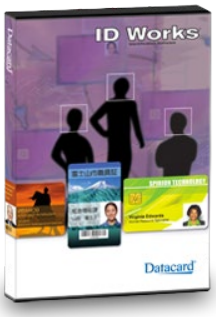


571897-003-ID Works Standard v6.5

• Standard Production software makes it easy to capture images, enter and retrieve data and print cards and reports separately from the design package.

• User-friendly features include predefined list fields, dropdown menus and data-driven card selection.

• The software also offers smart card support (proximity plug-in) to simplify smart card personalization management.



571897-001-ID Works Basic v6.5

• Enterprise software enables you to design cards, reports and production forms with speed and simplicity.

• Shape drawing, transparent backgrounds and ghost images help customize cards.

• The application lets you integrate production forms with multiple-table databases.

• Enterprise Designer software also allows you to access ID information stored in a directory service via the Lightweight Directory Access Protocol (LDAP).
