

Contactless Biometrics Solutions

for Financial Services During and Post COVID-19

Supporting Financial Services in the New Normal

In a pandemic world, customers' demands for Safe, Secure and Convenient Contactless Biometrics Digital Identity Solutions - from options of digital account opening to card issuance and cashless payments, is growing every day.

The Challenge for Financial Services

How to accelerate your Bank's transformation to Digital Identity Using Contactless Biometrics?

- How to simplify customer due diligence process?
- How to onboard new customers completely digitally on virtual branch?
- How to remotely authenticate and verify customers on different Digital Platforms or Channels?
- How to accurately enroll and identify customers using touchless Over The Counter Biometrics?
- How to enhance security and increase the efficiency of identification for Mobile Contactless Payments?

CompuLynx's efficient and secure Contactless Biometric Solutions enables FSPs to quickly respond to customers' needs of identification and verification for Remote Identity Banking as well as Over the Counter & Other Branch and Remote Banking Channels; ensuring business continuity whilst being compliant and defending their market position beyond the crisis.

A) CONTACTLESS BIOMETRICS FOR OVER THE COUNTER & OTHER BRANCH AND REMOTE BANKING CHANNELS

Biometrics in Over the Counter Branch Banking Channel

Fast and accurate identification for OTC systems in Branch Customer can quickly be authenticated through a fast biometric scan.

Biometrics in Other Branch and Remote Channels

Offer your customers safe cash withdrawals and deposits without using cards or PIN codes. Easily authenticate transactions at Agency Banking, Auto Branches, MoneyGram, Automatic Teller Machines (ATMs), Mobile Banking and Internet Banking.

B) REMOTE INDETITY BANKING SOLUTIONS

Remote Customer Onboarding

Onboard customers and verify their identity from anywhere through a virtual branch platform prioritizing security and risk control. Integrated with market-leading remote qualified trust services, PSD2 compliant, eSignature, Face and Voice biometrics, and more.

Biometric Authentication & Verification for Digital Banking Channels

Offer customers a new Secure and convenient way to access their account remotely - via Facial, and Voice recognition. Uses a proprietary mix of artificial intelligence, computer vision, and ID experts / Voice to determine if an identity document is authentic and belongs to the user.

eWallet

Enable customers to instantly send money to friends and family P2P. Provide contactless NFC card based payments, Mobile Money and QR Code based Payments. Retain via rich value-added services. Suits flexible wallet models - open or closed-loop, card, stored-value or bank account-based.
